

# U.S. Export Compliance Certification Series

## FOR U.S. PRACTITIONERS

In-depth training on the EAR and the ITAR, with real-time regulatory updates and COMPLIANCE CONTINUED content for a full year

Engaging and Interactive  
Online Training

Certification

A Full Year of Regulatory Updates  
and Continuous Learning

Content Enablers' online certification courses for trade compliance professionals present the in-depth, practitioner-level content required to prepare learners to address the complex, ever-changing U.S. export compliance challenges that companies face in the areas of jurisdiction, classification, licenses and authorizations, export clearance, trade compliance programs, and violation disclosures and management.

The **U.S. Export Compliance Certification Series for U.S. Practitioners** consists of four courses that can be taken individually — or as a complete series:

- ▶ **Foundations** of U.S. Export Compliance for U.S. Practitioners
- ▶ U.S. Export **Classification** for U.S. Practitioners
- ▶ U.S. Export **Authorizations** for U.S. Practitioners
- ▶ U.S. Export **Clearance** for U.S. Practitioners

Upon completion of each course, you will receive a Certificate of Completion from the **Schar School of Policy and Government** at George Mason University.

### Regulatory Updates

Regulations are continually evolving and it can be difficult to stay up to date. For the full period of your training subscription, important regulatory updates are automatically sent to you via your training interface.

### Continuous Learning

The learning doesn't stop once the training content is completed. Subscribers to any of the courses in this series get a year of free access to the **COMPLIANCE CONTINUED: Webinar Series for Export Practitioners**.

These regular in-person and online events bring together leading experts from industry, academia, and government to give you direct insight into regulatory developments, their impact on business and trade, and the future of trade regulation.
